

Credit Risk Programme

Module 1 The Retail Product

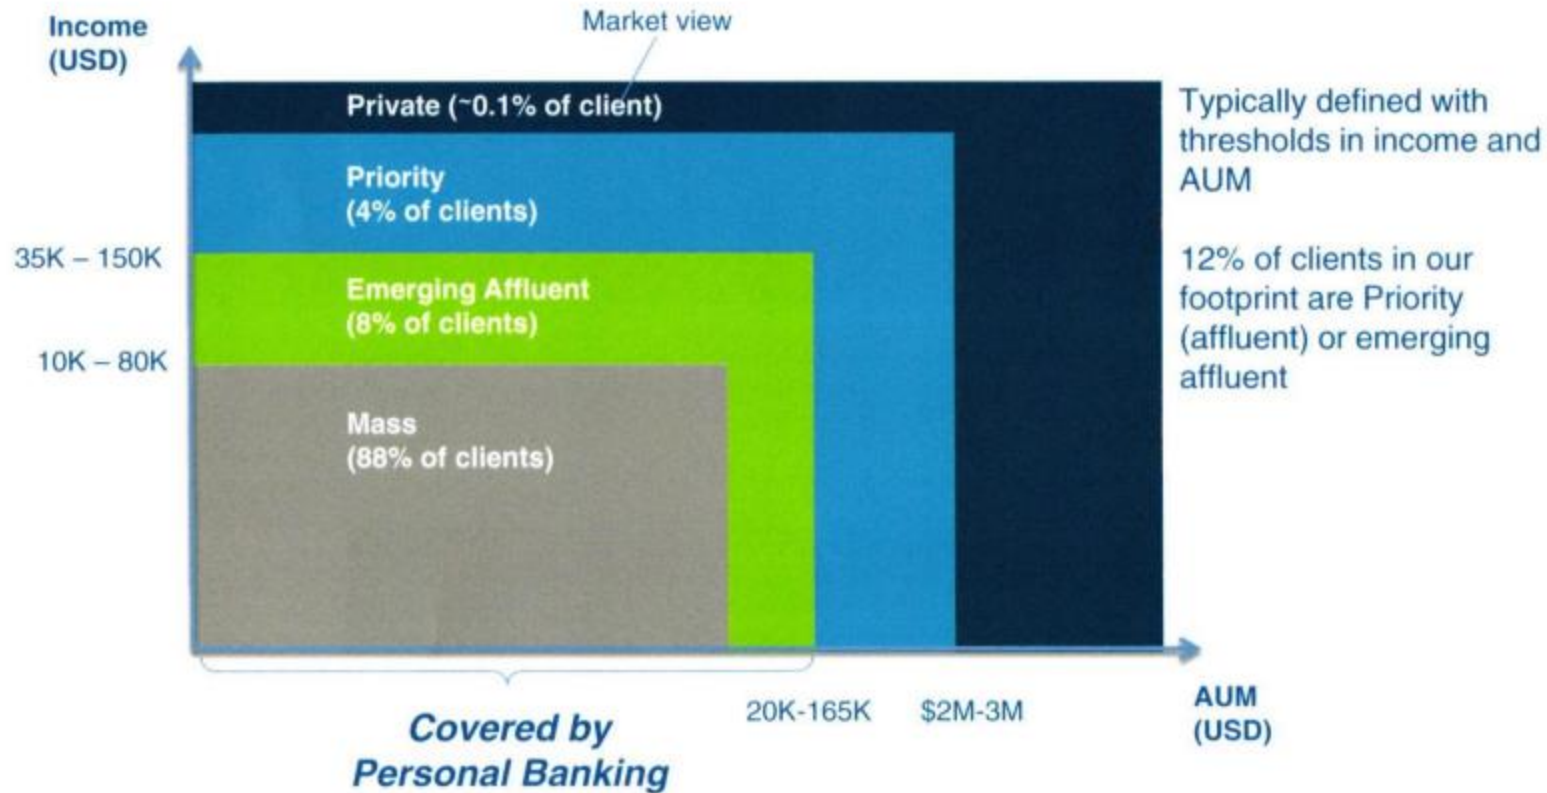

Learning Objectives

At the end of this session, you will be able to:

- Describe the Retail Banking (RB) product cycle from a customer's perspective
- Define the RB Credit Cycle of a facility
- Understand the design elements of Retail Banking Products
- Identify product design elements as they relate to risk mitigation

Segments in Retail banking

What Characteristics Describe these Target Populations?

| | Customer Life Cycle | | | |
|---------------------|---------------------|--------|--------|---------|
| | Young | Middle | Mature | Retired |
| Age | | | | |
| Income | | | | |
| Employment | | | | |
| Financial Behaviour | | | | |
| Credit Need | | | | |
| What Else? | | | | |

What Product Should be Offered to Each Group?

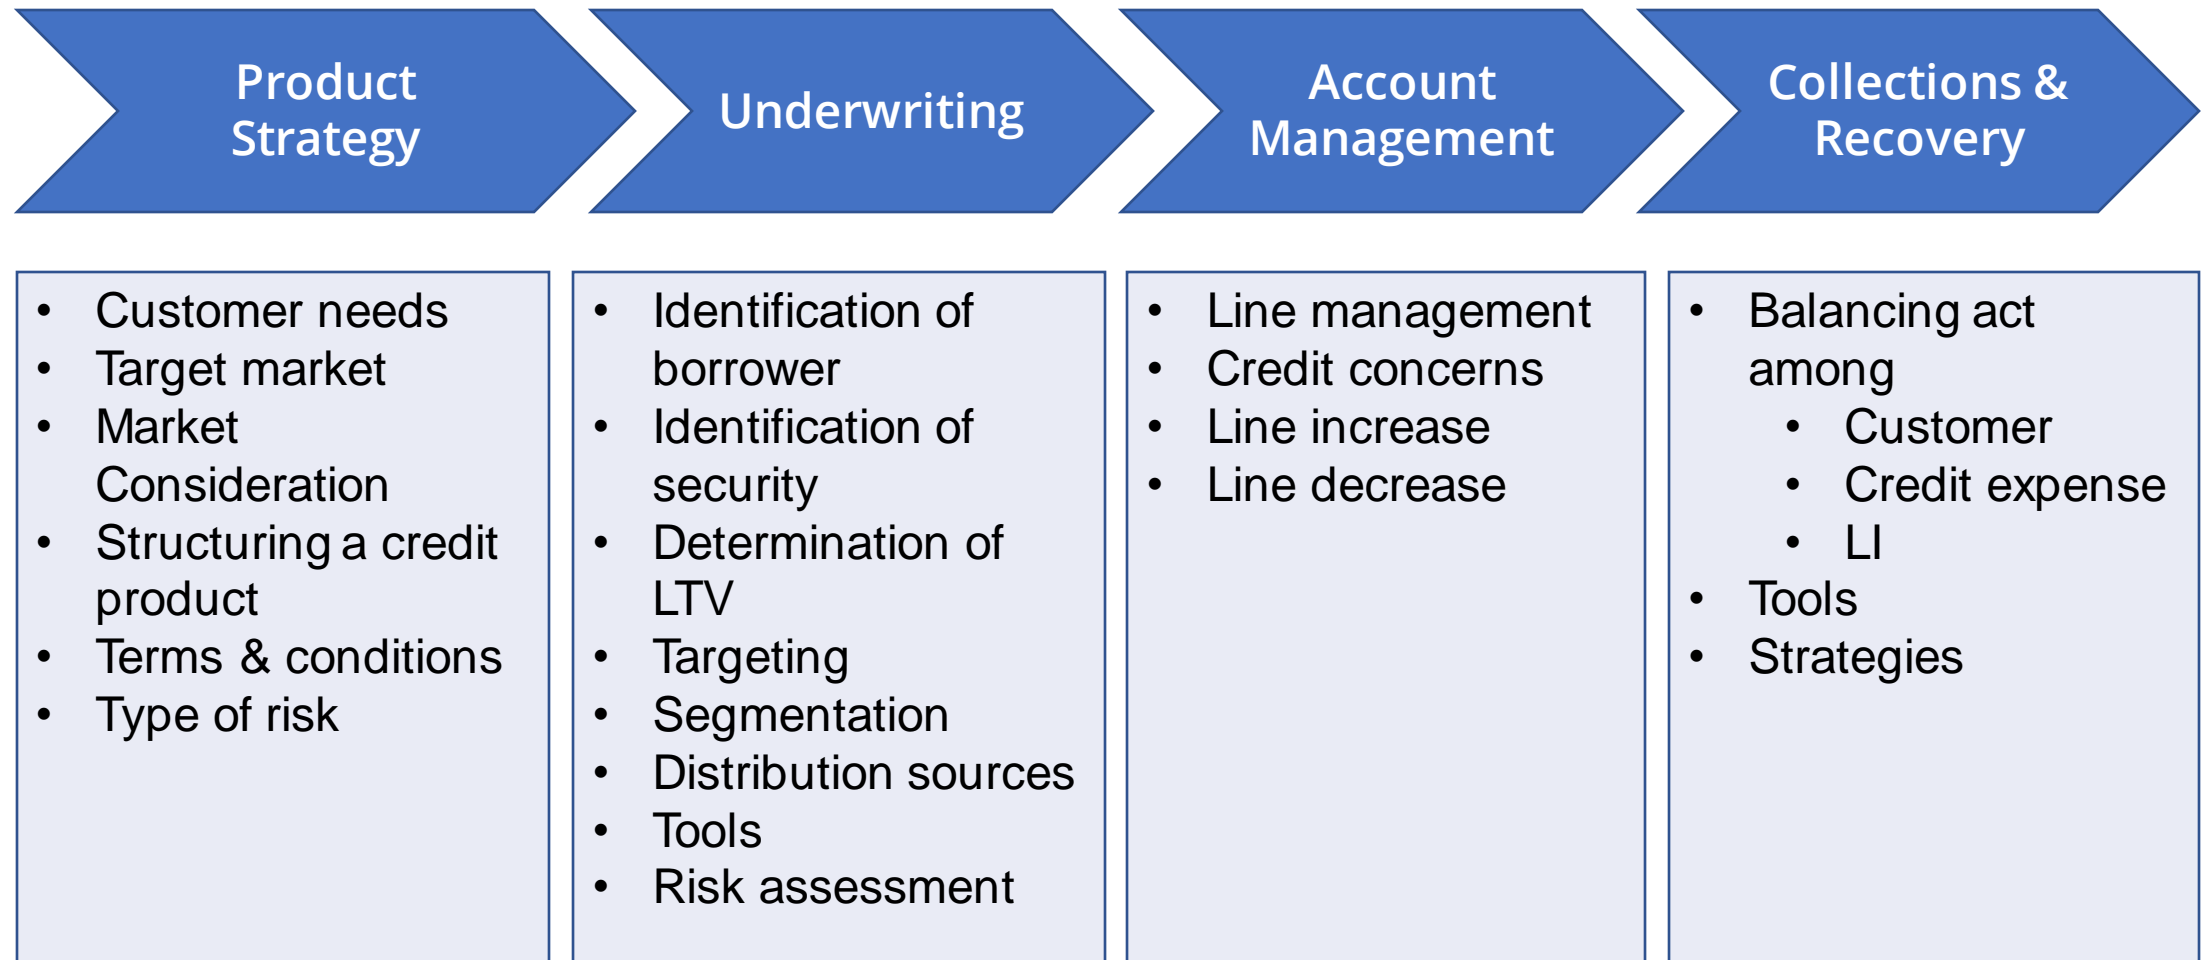

| | Customer Life Cycle | | | |
|--------------------|---------------------|--------|--------|---------|
| | Young | Middle | Mature | Retired |
| Credit Card | | | | |
| Mortgage | | | | |
| Personal Loan | | | | |
| Overdraft | | | | |
| Line of Credit | | | | |
| Instalment | | | | |
| Other Innovations? | | | | |

Common Risks for Consumer Lending Businesses

- Credit/Direct lending risk
- Documentation risk
- Operations/Process risk
- System risk
- Fraud risk
- Collateral risk
- Interest rate risk
- Price risk
- Legal/Regulatory risk
- Political (sovereign) risk
- Disaster/Event risk

Credit Cycle

Consumer Lending Characteristics

- Large customer base
- Large volume, small loans
- Utilize indirect business sourcing
- Products tied to consumer life cycle needs
- Limited financial data on consumers which can be supplemented with credit bureau data on their borrowing history
- Process dependent, volume approval process
- Portfolio management by aggregate performance statistics

Product Planning

At the end of this session, you will be able to:

- Product, target market, credit policies
- Credit initiation processes
- Loan impairment expectations
- Level of returns – RORWA, LI%ANR, LAR%ANR

No amount of Risk Management can protect you from a poor product design

Retail Lending Products: Key Elements

| | |
|----------------|--|
| Credit Card | <ul style="list-style-type: none">• Maximum Unsecured Exposure (MUE) cap at 12-24x, depending on customer segments• Debt Service Ratio (DSR) cap at 60-70%• Portfolio management actions include line increase, balance transfer, authorizations• Line increase not more 1x in the last 6 months• Payment holiday 1x in the last 12 months |
| Mortgage | <ul style="list-style-type: none">• Loan to Value (LTV) ranges from 70% - 90%• DSR cap at 65% - 70%• Amortizing loan structure (excluding “interest only” during construction up to for 3 years) |
| Personal Loans | <ul style="list-style-type: none">• MUE cap at 12x – 24x• DBR cap at 60% - 70%• Maximum tenor of typically 60 months• No negative amortization |

Business Banking Products: Key Elements

| | | |
|---|-----------------|--|
| <div> <div>Risk Approach</div> <div>Products</div> </div> | Program Lending | <ul style="list-style-type: none"> Standardized credit acceptance criteria for relatively homogenous target customer segments Aim to cover 80% of risky by rules & parameters, rest by controlled use of judgements (L3) Volume business model for standardized & simple products with smaller Limit and Net At Risk Portfolio management for standalone term relationships (ex. BIL, GIL, Mortgage) Rule driven client account monitoring for relationship managed customers with BWC facilities Collections / delinquency management and rule based provisioning standard |
| | BWC | <ul style="list-style-type: none"> Suite of simple working capital and trade products, and FX towards for hedging Mandate minimum credit turnover through SCB accounts Tenor in line with purpose (in general < 6 months, except overdraft and BG) Requires tangible collateral: gov't guarantees, credit insurance or product recovery as second way out |
| | BIL / GIL | <ul style="list-style-type: none"> Small unsecured / partly secured term loans with maximum 3-5 years tenor for BIL, 5 years tenor for GIL Target customer segment: SB and micro SB with annual turnover < \$10M Decisions largely based on minimum acceptance criteria, credit bureau behaviour, scorecards, proxy repayment capability calculations (DSR), supplemented by risk based credit interview and visit. Non-Financial income proof used – i.e., bank statement official business tax statement/VAT records Aggregate on-us and off-us unsecured exposure to mitigate over borrowing risk |
| | Mortgage / LAP | <ul style="list-style-type: none"> Long tenor property secured loans Repayment by monthly instalment List of acceptable property types (commercial, industrial and residential) along with associated Collateral Recovery Rates (CRR) documented in Country Credit Approval Document (CAD) |

Wealth Management Products: Key Elements

| | | | |
|--|---|--|--|
| Class 1 | <ul style="list-style-type: none"> Lending against diversified liquid collateral from investment grade issuers. LTVs determined by: <ol style="list-style-type: none"> Equities - historical volatility, mkt. cap and trading volume (liquidity). 5000+ stocks with LTVS from 30-70% Bonds - LTVS on sovereign and corporate investment grade bonds. LTVS based on tenor and issue size (minimum USD250m) Structured products - LTVs for all 100% principal protected (PP) and select non-PP structures. List of issuers restricted to 10 global names Mutual funds - LTVs on funds reviewed and distributed by SCB. LTVs based on volatility Others - insurance, hedge ,funds etc. LTVs applied on individual product basis | | |
| Class 2 | <ul style="list-style-type: none"> Lending against non-diversified, non-standard collateral which may have limited liquidity - e.g., promoter share financing. LTVS determined on bespoke basis based on review of the client, existing corporate relationship with WB etc. | | |
| Class 3 | <ul style="list-style-type: none"> Lending against residential and commercial real estate. includes amortizing and interest-only mortgages | | |
| Class 4 | <ul style="list-style-type: none"> Margin trading platform for sophisticated Private Bank customers offering trading across various asset classes - FX, equities, fixed income | | |
| Class 5 | <table border="1"> <tr> <td data-bbox="369 1035 1421 1338"> <ul style="list-style-type: none"> Provider Risk - e.g. GVEC / Maddoff Product Risks - We have a duty of care to ensure <ol style="list-style-type: none"> Counterparty pricing is fair Pricing clients fairly - no gouging, especially for products with a degree of opacity Adequate liquidity should client require early termination </td><td data-bbox="1421 1035 2476 1338"> <ul style="list-style-type: none"> Suitability & Appropriateness - risks associated with <ol style="list-style-type: none"> inaccurate product risk ratings Client investment profiling errors Mis-selling / vulnerable customers </td></tr> </table> | <ul style="list-style-type: none"> Provider Risk - e.g. GVEC / Maddoff Product Risks - We have a duty of care to ensure <ol style="list-style-type: none"> Counterparty pricing is fair Pricing clients fairly - no gouging, especially for products with a degree of opacity Adequate liquidity should client require early termination | <ul style="list-style-type: none"> Suitability & Appropriateness - risks associated with <ol style="list-style-type: none"> inaccurate product risk ratings Client investment profiling errors Mis-selling / vulnerable customers |

| Conveyancing | ✓ | | |
| Insurance company | ✓ | ✓ | ✓ |
| Increasing exposure/evergreen | | | ✓ |
| Lack of quality credit bureau information | | | ✓ |
| Disappearance of collateral | | ✓ | |
| Market risk | ✓ | ✓ | ✓ |
| Concentration risk | ✓ | ✓ | ✓ |
| Fraud | ✓ | ✓ | ✓ |

Retail Profit Model – Operating Expenses

| Issue | First Year | Ongoing |
|---|------------|---------|
| Product Set-up (Systems Development, Legal) | x | |
| Acquisition (Marketing) | x | |
| Initiation (Processing, Booking) | x | |
| Overhead | x | x |
| Maintenance (Operations, Billing, Customer Service) | | x |
| Account Closure | | x |
| Collections | | x |
| Fraud | x | x |

Manage Product “Drivers” to Reach Profit Objective

| | Revolving | Installment |
|------------------------------------|-----------|-------------|
| \$ CPA (Cost Per Account Acquired) | x | x |
| % Approval | x | x |
| % Booked | x | x |
| % Activation | x | - |
| % Line Utilization | x | - |
| % Revolver Rate | x | - |
| % Retention | x | x |
| % Collection Cost | x | x |
| % LI to ANR | x | x |
| % RoRWA | x | x |
| % LAR to ANR | x | x |

Products Summary

- 
- Each product's characteristics determine the type of risks associated with it.
 - These risks occur at a different stage of the product cycle.
 - While these risks cannot be avoided, credit policies and processes should be designed and implemented to mitigate these risks

Points to Remember

Let's revisit some of the most important points of this section

- Good product design is a risk mitigation tool.
- Product structure and features drive profitability.
- Some costs are up-front, such as initiation, while others are portfolio running costs.
- Some costs, such as strong underwriting systems drive long term profitability.

Questions

Notes
