

# Credit Risk Programme

Module 10  
Bringing it Together

# Learning Objectives

At the end of this module, you will have an overview of:

- Portfolio overview
- Decision tools
- New to bank acquisition
  - Incorporate Risk appetite and RDF
- Existing to Bank – Portfolio Management
  - Incorporate Risk appetite and RDF
- Portfolio Monitoring and Tracking

# Malaysia Credit Cards

## CAD Extract

- Malaysia CCPL portfolio has been liquidating rapidly from a high of US\$ 1.25bn in 2012 to US\$ 0.8998bn as of end June 2015. The portfolio has declined by 23% from the beginning of 2015. Overall performance has been trending worse with lower reduction in delinquent inventory and losses compared to ENR. Overall LAR is projected to decline from 5.1% in 2014 to 4.9% in 2015. 2014 and early reads of 2015 vintage performance are worse than prior vintages with cumulative LAR over 3 years of H72074 vintage is projected to be 5.0% for PL and 1.2% for Cards.
- Overall performance is expected to improve LAR and RORWA. LAR for Personal Loan is going to improve from 2.1% in 15 to 4.1% in 2017, for Cards LAR will improve from 8.3% in 2015 to 9.0% in 2017. RORWA for Loans is going to improve from 3.2% in 2015 to 3.5% in 2017 and for Cards from 7.5% in 2015 to 7.6% in 2017. Monthly monitoring of portfolio and TTD statistics will be the basis to assure performance is in line with expectations.

Proposed Approved Peak Exposure (up to Sep 2016)	Product	ENR (\$m)	Exposure (\$m)	Recession Loss (\$m)

## New originations- % Distribution

## Financial Metrics and Underlying performance are diverging

- Apparent reduction in losses from cards
  - driven by restructuring accounts booked as personal loans (losses transferred)
- Deterioration in vintage performance
- High percentage of volatile concentration in portfolio

## Vintage Chart

# "Real" Loss Recognition for Malaysia Unsecured Portfolio

## Malaysia - DRP Misallocation

Malaysia Unsecured DRP (restructured accounts) are booked on the same system as loans (RLS).

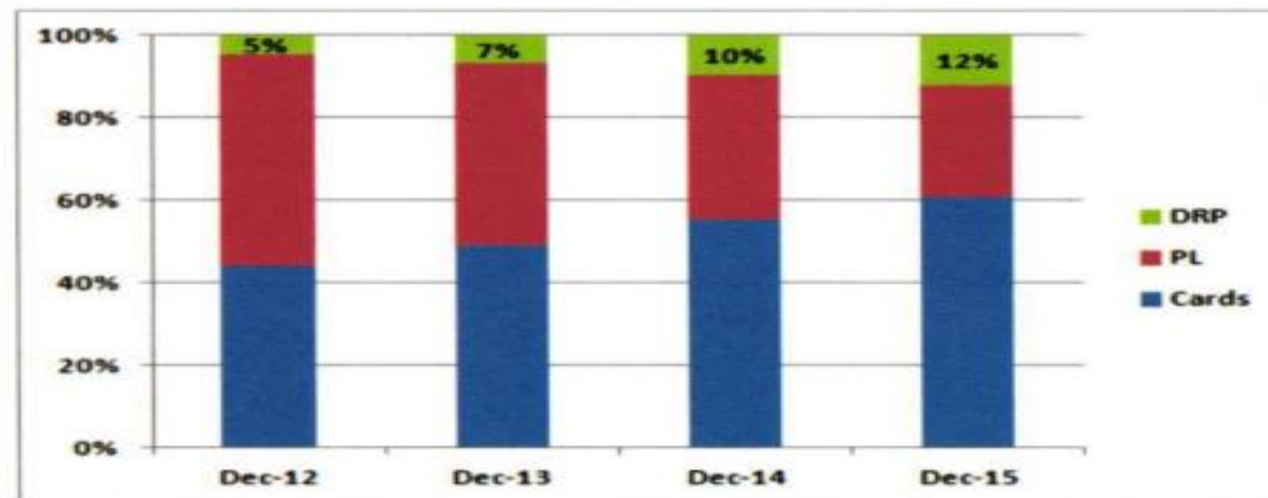

- Due to system limitation, the P&L-of the DRP book is reported under "Personal Loans"
- Impact of this misalignment is that CC standalone financials look "artificially" healthy, and PL performance deterioration is compounded
- With DRP (majority being AKPX or regulatory conversions) book growing, the loss rate of Pt is deteriorating

As per GL	LI % (Loss Rate)
Personal Loans	7.5%
Credit Cards	3.2%
<b>Total</b>	<b>5.1%</b>

After re-allocating DRP  
to originating product

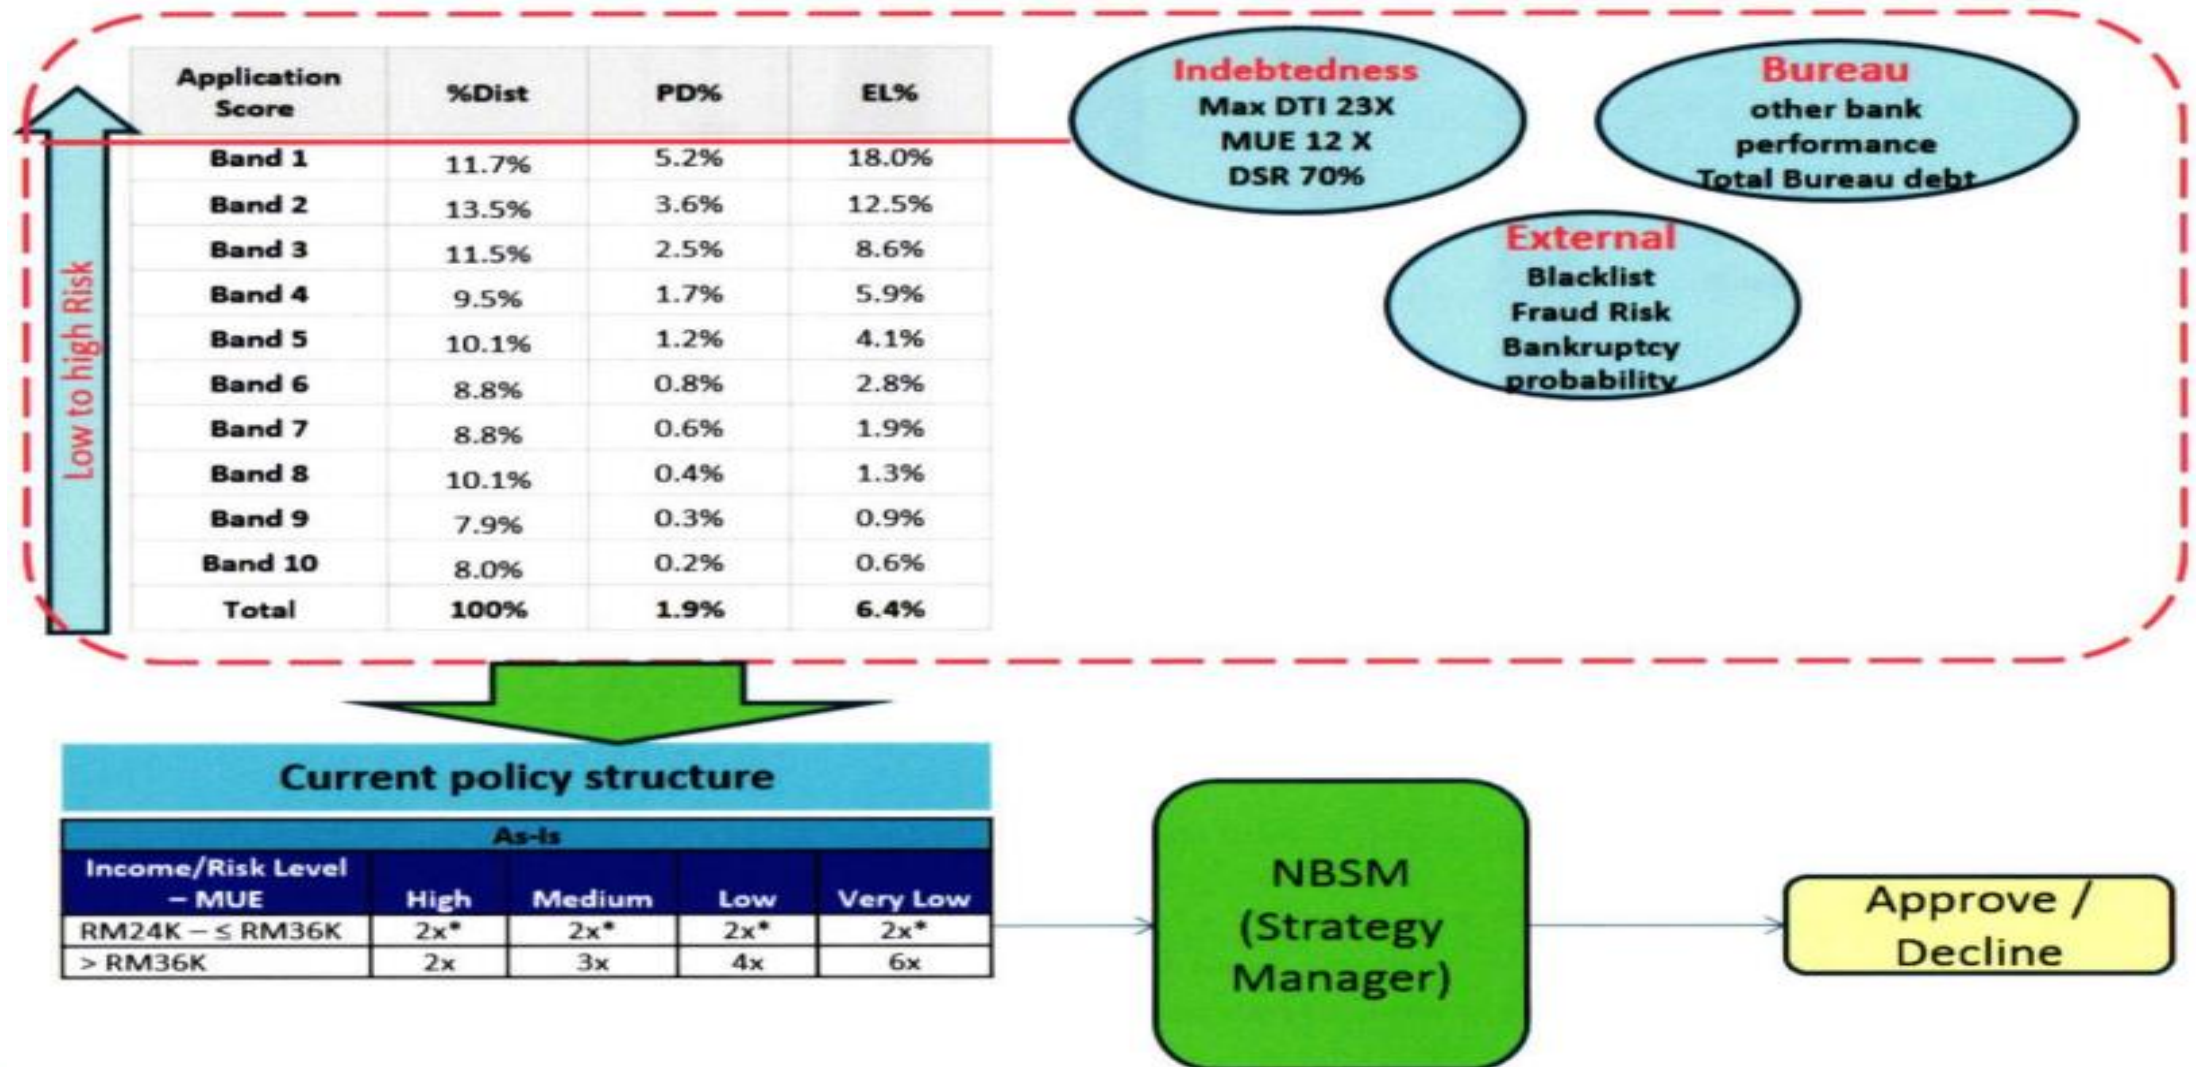

Real Loss	LI % (Loss Rate)
Personal Loans	5.0%
Credit Cards	5.2%
<b>Total</b>	<b>5.1%</b>

Increasing % of DRP in the  
Unsecured Portfolio
